200+ Exchanges Worldwide

30+ Years Powering the Global Capital Markets

Lightning-Fast Data Delivery: Experience Single-Digit Microsecond Latencies

AtlasFeed offers unparalleled performance with up to single-digit microsecond latencies, ensuring lightning-fast data delivery. Fully managed, it guarantees seamless operation, relieving clients of the burden of maintenance. Its flexibility enables customization to meet specific client requirements, ensuring adaptability across diverse use cases. With an exceptional track record of resilience, AtlasFeed ensures uninterrupted data access, crucial for critical operations.

What is AtlasFeed?

AtlasFeed is the industry's leading normalized, consolidated data feed service, supporting hundreds of markets across multiple asset classes. It's the solution of choice for capital markets participants.

What does it support?

The feed supports 200+ unique global sources including all major Equities and Derivatives exchanges and carries complete content sets from the most demanding data sources.

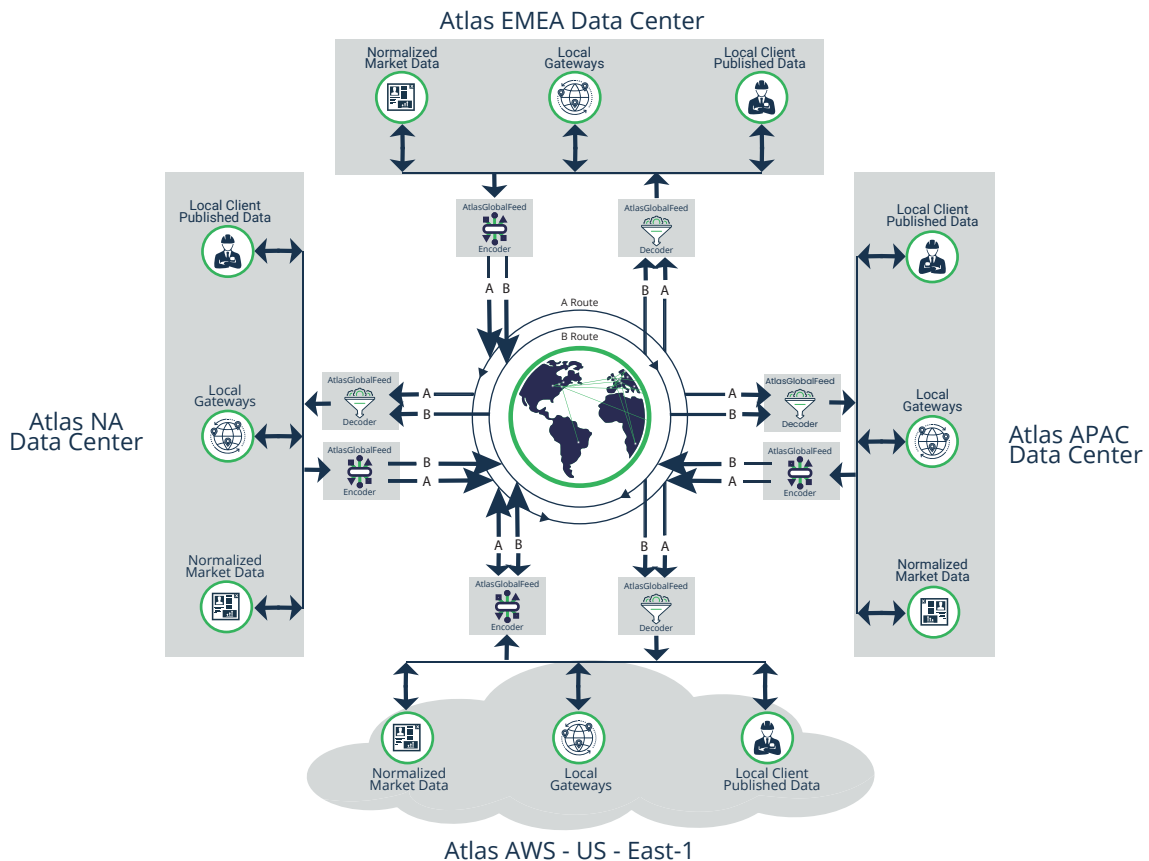

Why is it unique?

AtlasFeed uses an efficient and proprietary messaging protocol to ensure integrity, supported by a fully resilient, high availability network, accessible via a single robust, sophisticated API.

Effortless Integration: Global Data Catalog Across Multiple Languages

AtlasGlobalFeed is used for delivery between data centres via distinct data streams (A and B) to ensure robust global data delivery. Access to the data is via API, available in a choice of programming languages across multiple operating systems for enhanced accessibility and ease of integration.

Highly Optimized and Low Latency

Single, Performance-Driven API

Robust Architecture Ensuring Reliability & Stability
